Anyone can learn CPR, and everyone should!

Can you spare 10 minutes to learn how to save someone's life? Since 80% of cardiac arrests occur at home, the life you save with CPR is likely to be someone you know and love. Bystander CPR (hands only) provided immediately after sudden cardiac arrest can up to triple a victim's chance of survival, yet only 32% of cardiac arrest victims get CPR from a bystander. Many are concerned they might do something wrong, but the only way to make things worse is to do nothing at all.

Your local firefighters and lifeguards will be offering this important and **FREE** training at various locations throughout Los Angeles County. No appointments are necessary; just show up at any convenient location at any time during the hours listed. Wait times should be minimal, if at all, as the training should only take 5 to 10 minutes of your time.

For additional training locations in Los Angeles County Fire Department jurisdictions, please visit our website:
